

Rebate Requirements

PSEG Long Island offers a wide array of incentives and rebates for residential customers to help reduce their energy usage and lower monthly bills. For a limited time, residential customers can receive rebates from PSEG Long Island through the purchase of eligible ENERGY STAR® certified and other selected products and Ducted/ Ductless Non-Cold Climate Air Source Heat Pumps. Please refer to the below guidelines for rebate eligibility requirements:

Requirements for **all** applications:

- Customer must have a valid PSEG Long Island residential account number
- All required documents must be uploaded in appropriate application section
 - Dated sales receipt/paid invoice
 - Must show manufacturer, model number, and price paid
 - Online Purchases require proof of delivery/proof of pickup receipt or the rebate will be denied
- Account service address and installation address on receipt must match to receive rebate (if applicable)
- A PSEG Long Island representative may contact the account holder to schedule an on-site verification of installed equipment
- A PSEG Long Island representative may request photos of the installed equipment and of the nameplate on the equipment. Photos of the nameplate must clearly show the model and serial number of the installed equipment.

Additional Requirements for all **appliance** applications:

- Online rebate application must be completed within 45 days of purchase
- The rebate amount cannot be more than 50% of the retail purchase price paid
- Appliances must be ENERGY STAR or ENERGY STAR Most Efficient 2022 certified where designated

Additional Requirements for Lawn Equipment

- Must purchase charger and battery to qualify for rebate. (Tool only does not qualify)

Additional Requirements **for air source heat pump** applications:

- Online rebate application must be completed within 90 days of purchase and installation
 - **Rebates are limited to 2 units per every 5 years.**
- AHRI Certificate must be provided

Additional Requirements for Solar Pool Cover

- To be eligible for a Solar Pool Cover rebate - Heat Pump Pool Heater should also be installed at the Customer site
 - Heat Pump Pool Heater can be installed at the same time or must have been previously rebated through the PSEG Long Island program

Terms and conditions are subject to change without notice, including early termination of promotions. No additional fees apply. Rebates will be issued in check form (or bill credit) within 10 weeks. By providing a telephone number or email address you are giving consent to be contacted about matters

that are closely related to the utility service. PSEG Long Island administers the rebate program on behalf of the Long Island Power Authority, the rebate program sponsor.

PSEG Long Island \$500 Smart Charger Rebate Terms

- You must be a PSEG Long Island residential customer.
- Account service address and installation address on receipt must match to receive this rebate.
- There is a limit of two rebates per year, per residential account. You must purchase your Electric Vehicle Charging equipment between January 1 and December 31, 2022.
- The rebate application must be sent in within 45 days of purchase but postmarked no later than December 31, 2022. • Please allow up to 8 weeks for delivery of the rebate check.
- PSEG Long Island is not responsible for any tax liability imposed as a result of rebate payments.
- PSEG Long Island is not responsible for lost or undeliverable mail or email.
- PSEG Long Island reserves the right to use the customer rebate to credit accounts in arrears.
- Electric Vehicle Charging Equipment model rebated must be one of the following (subject to change):
 - o ChargePoint Home, CPH-25
 - o ChargePoint Home Flex, CPH-50
 - o Clipper Creek HCS40 (JuiceNet enabled)
 - o JuiceBox 32
 - o JuiceBox 40
 - o JuiceBox 48
- By participating in the Smart Charge Rebate, the customer authorizes manufacturers of eligible charging devices listed (above) to share charger usage data with PSEG Long Island. Usage data includes information about your charging patterns start date and time, duration of charging session, charging power level (kW), total charging energy (total electricity consumed in kWh), 15- minute interval charging energy (kWh), starting state of charge, ending state of charge. Your charging data will help PSEG Long Island manage the grid to maintain optimum efficiency. With this data we can anticipate where equipment upgrades are needed due to increased usage from electric vehicles.
